Objective

AI/ML-focused Computer Science student with strong skills in Python, TypeScript, Java, and C++. Experienced in building multi-agent LLM systems, browser-native AI tooling, and full-stack applications. Seeking an internship applying research and engineering skills to agent systems, context handling, and tool use.

Projects

Multi-Agent Framework for Real-Time Financial Sentiment Analytics & Conviction Modeling *Role: AI Agent Developer*

Building and iteratively refining the AI agents of a financial analysis platform that leverages multiple collaborating LLM agents to collect, analyze, and evaluate real-time financial news and market sentiment. The agents support dynamic confidence scoring and conviction modeling for informed investment decisions, within an architecture that integrates LLM-based reasoning, real-time data processing, and interactive analytics.

FocusAI – AI-Powered Productivity & Screen Time Tracker *Role: Solo Developer (Personal Project)*

Independently building a cross-platform desktop application using Electron, React JS, and Python to monitor application usage and analyze productivity. Implemented real-time active window tracking, browser activity detection, SQLite-based data storage, and AI-powered productivity classification using LangChain and Ollama, along with a React JS analytics dashboard that surfaces daily usage statistics, productivity insights, and distraction detection.

Forest Fire Risk Monitoring System *Role: Data Pipeline Developer*

Built the Apache NiFi data flow and API integration for a real-time ETL pipeline that processes NASA FIRMS VIIRS satellite data. Automated data extraction and transformation, enriched records with weather data from the OpenWeatherMap API, and supported fire risk classification to generate real-time alerts for high-risk regions.

Skills

Languages: Python, TypeScript/JavaScript, Java, HTML, CSS
Frameworks/Libraries: LangChain, LangGraph, FastAPI, React JS, Electron, Framer Motion
AI/Cloud: Agentic AI, Oracle Cloud Infrastructure (OCI)
Databases: MySQL, SQLite
Developer Tools: Git/GitHub, Docker, Postman, Ollama, IntelliJ IDEA, VS Code, Maven
Coursework: Machine Learning, NLP, Operating Systems, Computer Networks, OOP

Education

MLR Institute of Technology Hyderabad, Telangana, India
B.Tech in CSE (AI & ML), CGPA: 7.25/10 *Expected 2027*

Polytechnic Diploma Telangana, India
Computer Science & Engineering, CGPA: 7.95/10 *2021 – 2023*

Kakatiya Olympiad School Telangana, India
SSC, GPA: 9.8/10 *2020*

Certifications

Oracle Certified Foundations Associate – Agentic AI Credential ID: 332173347AAI26OFA
Oracle University *Oct 2026*

Extra-Curricular Activities

Genesis – Game Development Hackathon

- Collaborated on a 3D game build; contributed to gameplay implementation and feature integration using agile practices

Zenith Hackathon – FarmX

- Built an AI-powered smart farming solution offering intelligent crop recommendations and data-driven decision support
